

COMPACTION RECEIVER
Containers

*Available in 21 cu. yd. thru 50 cu. yd. capacities
and from 14' to 26' lengths.*

C-TEC's closed Receiver Containers are engineered and constructed to withstand the repeated high pressure of today's compactors. They are designed to provide long-lasting dependable service for high volume refuse accounts. Each container is built by our trained and experienced personnel to fit most major brands of roll-off hoist.

All containers are inspected by our quality control department and must pass our rigid test procedures.

Whatever the need, C-TEC can supply you with the compaction container to satisfy your refuse needs. C-TEC represents many years of experience in the manufacturing of refuse containers.

Containers

COMPACTION RECEIVER Containers

Standard features

1. Heavy duty rear hinges with grease fittings

2. Compatible with most major roll-off hoist systems.

3. Primed and finish painted in the color of your choice.

4. Door openings for most major brand stationary compactors.
